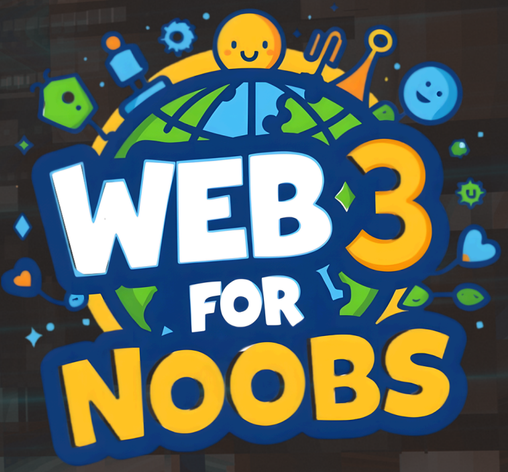
MARYAM KHAN

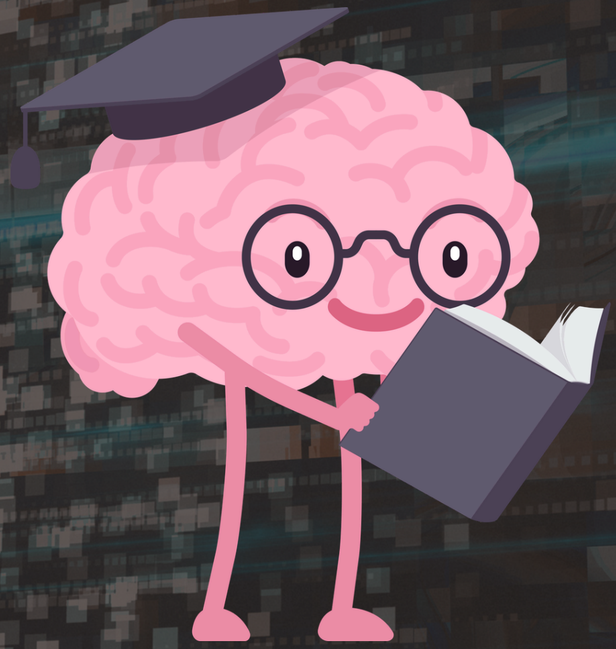
ABOUT US

- Web3 education platform for BEGINNERS
- No jargon or technical terms. We break it down.
- Goal = Everyone should be able to understand the world of Web 3



AGENDA

1. Web3 Basics: Crash course
2. Deep-dive: Stablecoins
3. DeFi VS TradFi
4. Global use-cases
5. Hong Kong Spotlight (Ft. KIRAPAY)
6. Rapid-fire quiz
7. AMA (Ask Me Anything)



OUR PARTNER & GUEST SPEAKER:

KIRAPAY

Cross-chain payment gateway that makes global payments simple, fast, and flexible.

ELVA HUANG

Head of Growth at KIRAPAY

CRASH COURSE:

WEB3: BACK TO THE BASICS

THE 3 PHASES OF THE INTERNET

WEB1

90'S

The old internet where you could ONLY READ.

WEB2

EARLY 2000'S

Companies OWN and store your data

Centralised

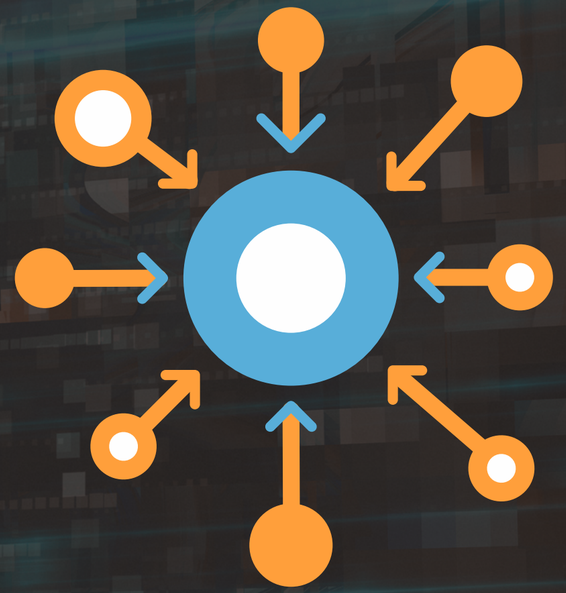
WEB3

~2014

A new internet where YOU own your data

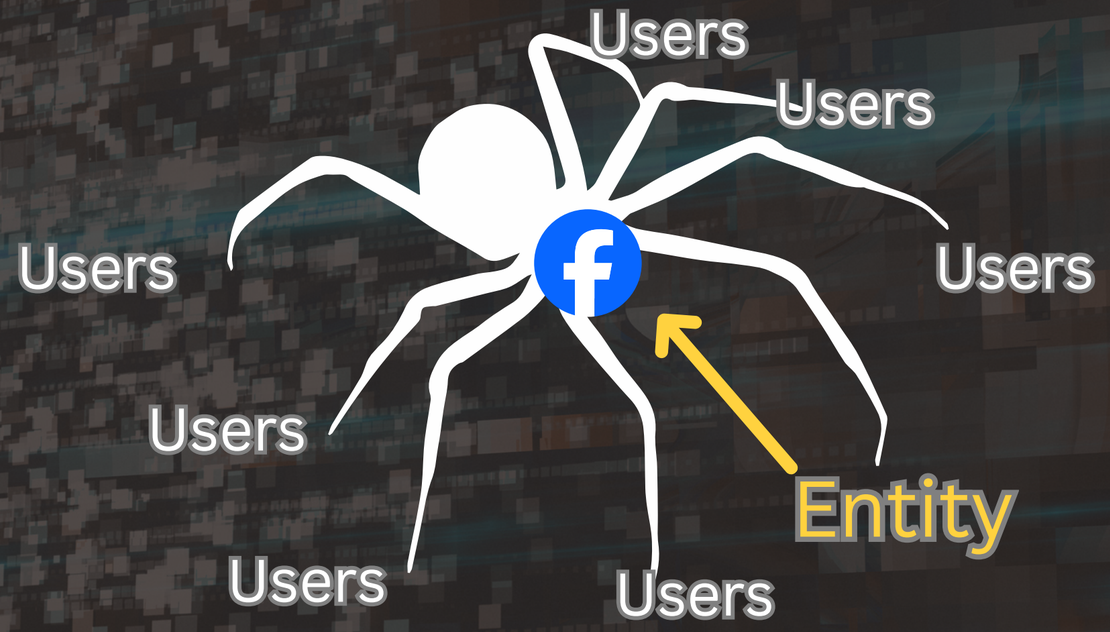
Decentralised

CENTRALISED *VS* DECENTRALISED



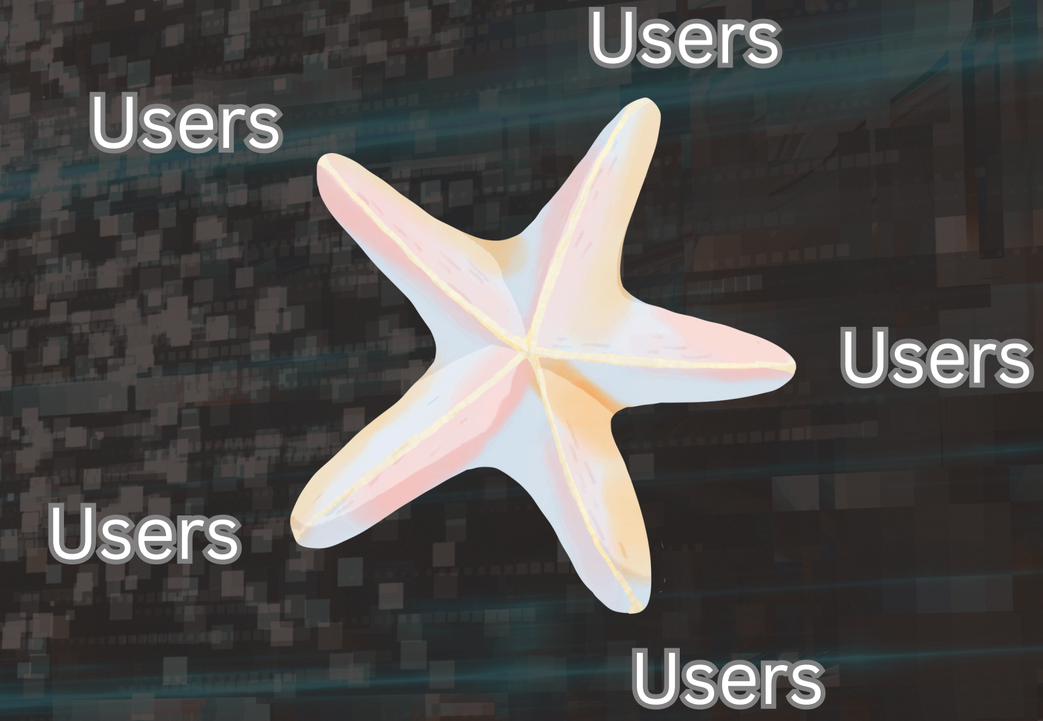
WEB2 = CENTRALISED

One company holds the power. They can shut you out whenever they want.



WEB3 = DECENTRALISED

No single person or entity is in control. Power is spread across a network.



WHAT LIVES ON THE BLOCKCHAIN?

CRYPTO

NFT'S

D'APPS

DEEP DIVE INTO STABLECOINS

1 STABLECOIN = 1 USD
OR ANY OTHER STABLE ASSET

THE BENEFITS

FASTER

CHEAPER

AVAILABLE 24/7

THE DIFFERENT TYPES

FIAT

Stable currency

COMMODITY

Gold, Silver etc.

CRYPTO

Bitcoin, ETH

WHO ISSUES THEM?

PRIVATE TECH COMPANIES

CIRCLE

TETHER

BIG FINANCIAL COMPANIES

PAYPAL

REGULATED BANKS

HSBC

TRADFI

VS

DEFI

THE DIFFERENCE

TRADFI = TRADITIONAL FINANCE

DEFI = DECENTRALISED FINANCE

REAL-WORLD USE CASES

EXAMPLES

NIGERIA

Preserving Wealth
